

IN THE DRAWINGS

Applicants submitted amended formal drawings in a letter dated May 27, 2003. In his most recent Office Action, the Examiner indicated that the drawings filed on February 5, 2003 were accepted; however, he didn't mention those filed with the communication of May 27, 2003. Accordingly, Applicants are re-filing the amended formal drawings, as previously filed with the communication of May 27, 2003.

To reiterate the amendments that were made, FIGS. 1, 4, and 8A have been amended. In FIG. 1, the arrow pointing from the Speakers 9 to the System Bus 2 was changed by deleting the arrowhead touching the System Bus 2; in FIG. 4, the number "30" was changed to -50- to conform to the Detailed Description; and in FIG. 8A, the text within box 205 was reformatted for clarity.

Applicants respectfully request that the Examiner indicate in the next Office Action whether these drawing amendments are approved.

AMENDMENT UNDER 37 C.F.R. 1.116 – EXPEDITED PROCEDURE

Serial Number: 10/003,238

Filing Date: October 26, 2001

Title: ELECTRONIC ASSEMBLIES WITH FILLED NO-FLOW UNDERFILL (as amended)

Assignee: Intel Corporation

Page 3

Dkt: 884.535US1 (INTEL)

IN THE TITLE

Please amend the title as follows:

**ELECTRONIC ASSEMBLIES ASSEMBLY WITH FILLED NO-FLOW UNDERFILL
~~AND METHODS OF MANUFACTURE~~**

IN THE SPECIFICATION

Please make the paragraph substitutions indicated below. The specific changes incorporated in the substitute paragraphs are shown in the following marked-up versions of the original paragraphs.

The paragraph beginning on page 4, line 12 is amended as follows:

In the following detailed description of embodiments of the invention, reference is made to the accompanying drawings which form a part hereof, and in which is shown by way of illustration specific preferred embodiments in which the subject matter may be practiced. These embodiments are described in sufficient detail to enable those skilled in the art to practice them, and it is to be understood that other embodiments may be utilized and that structural, mechanical, compositional, procedural, and electrical changes may be made without departing from the spirit and scope of the present subject matter. Such embodiments of the inventive subject matter may be referred to, individually and/or collectively, herein by the term “invention” merely for convenience and without intending to voluntarily limit the scope of this application to any single invention or inventive concept if more than one is in fact disclosed. The following detailed description is, therefore, not to be taken in a limiting sense, and the scope of embodiments of the present invention is defined only by the appended claims.

Please delete the subtitle “Conclusion” on page 15, line 1.

The paragraph beginning on page 16, line 21 is amended as follows:

Although specific embodiments have been illustrated and described herein, it will be appreciated by those of ordinary skill in the art that any arrangement that is calculated to achieve the same purpose may be substituted for the specific embodiment shown. This application is intended to cover any adaptations or variations of the present inventive subject matter. Therefore, it is manifestly intended that embodiments of this invention be limited only by the claims and the equivalents thereof.
